Posadas, Misiones, Argentina

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years shipping production software. I build around the goal software must serve and how to get there, with a focus on performance, user feedback, and flow. Experience leading teams, migrating monoliths to modular architectures, and delivering platforms with measurable impact (410+ active users). Seeking remote full stack or backend roles where I can drive efficiency and user experience.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, Python, SQL

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Backend: Node.js, Next.js Route Handlers, REST APIs, Prisma, Zod, Clean Architecture

Databases: PostgreSQL, MySQL, Oracle, Redis

DevOps and Quality: Docker, Nginx, Git, GitHub Actions, Jest, Playwright

Integrations: MercadoPago, Google Maps API, Resend, WhatsApp (wa.me)

Other: Multi-tenant SaaS, RBAC, IoT (Arduino), Linux

PROFESSIONAL EXPERIENCE

Tech Lead · Full Stack Developer

Chamber of Representatives of Misiones | Posadas, Argentina | 2025 – Present

- Coordinate the development team: tasks, priorities, deadlines, and ongoing feedback.
- Drove Next.js, TypeScript, and Prisma as the area's new standard.
- Delivered a core change to the main system in under one week.
- Moved PDF conversion to background workers so users keep working while files process.
- Replaced full DOM reloads with async fetch on search: from ~6 s to ~5 ms response time.
- Migrated PHP monoliths (mixed CSS/JS) to a clean-architecture API with modular assets.
- Designed the Institutional Portal (410+ active users): unified access, DNI auth, and tutorials module.

Web Developer

Chamber of Representatives of Misiones | Posadas, Argentina | 2021 – 2023

- Maintained and evolved internal PHP systems: optimized queries and smoother interfaces.
- Built admin tools, calculation systems, and cross-system data export pipelines.
- Built Python + API + Arduino interface for interactive robot (~200 weekly users on institutional visits).

PROJECTS

SaaS Online Store · Personal Project · In Progress

- Multi-tenant e-commerce SaaS for Argentine SMBs: catalog, checkout, shipping, and admin panel.
- Checkout with Redis stock reservation (10 min TTL), MercadoPago/Viumi payments with idempotent webhooks.
- WhatsApp-first guest checkout with anti-fraud verification in the admin panel.
- Distance-based shipping (Google Maps), coupon/combo engine, and per-tenant RBAC.
- Documented monorepo (~370 TS files), services layer, GitHub Actions CI, Jest + Playwright · Next.js, PostgreSQL, Redis, Docker.

EDUCATION

Self-taught software development

Continuous learning in production: 4+ years building real-world systems
